

Attorney Docket No.:PI726RIP1
Appln. No.: 09/713,425

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1.-59. (Cancelled)

60. (Currently Amended) An *ex vivo* complex comprising a polypeptide comprising a variant Fc region with increased affinity for an FcγR allotype noncovalently bound to an FcγR allotype or an extracellular domain thereof, which wherein said polypeptide comprises an amino acid modification at any one or more of amino acid positions 265, 267, 268, 270, 290, 298, 307, 315, 320, 331, 333 or 334 of the Fc region, wherein the numbering of the residues in the Fc region is that of the EU index as in Kabat, and wherein the polypeptide is noncovalently bound *ex vivo* to an FcγR allotype or an extracellular domain thereof.

61. (Currently Amended) The polypeptide complex of claim 60 wherein the FcγR allotype for which the polypeptide has increased affinity is selected from the group consisting of FcγRIIA-Phe158, FcγRIIA-Val158, FcγRIIA-R131 and FcγRIIA-H131.

62. (Currently Amended) The polypeptide complex of claim 60 ~~which wherein said~~ polypeptide displays increased binding to FcγRIIA-Phe158.

63. (Currently Amended) The polypeptide complex of claim 62 ~~comprising wherein said~~ polypeptide comprises an amino acid modification at any one or more of amino acid positions 290, 298, 333 or 334 of the Fc region, wherein the numbering of the residues in the Fc region is that of the EU index as in Kabat.

64.-79. (Cancelled)

Attorney Docket No.: P1726R1P1
Appln. No.: 09/713,425

80. (Currently Amended) An ex vivo complex comprising a polypeptide comprising a variant Fc region noncovalently bound to an FcγRIIIA-Phe158 allotype or an extracellular domain thereof, which wherein said polypeptide comprises an amino acid substitution at any one or more of amino acid positions 290, 298, 333 or 334 of the Fc region, wherein the numbering of the residues in the Fc region is that of the EU index as in Kabat, and wherein the polypeptide is noncovalently bound ex vivo to FcγRIIIA-Phe158 or an extracellular domain thereof.

81. (Currently Amended) The polypeptide complex of claim 80 ~~which~~ wherein said polypeptide comprises an antibody.

82. (Currently Amended) The polypeptide complex of claim 80 wherein the variant Fc region comprises a variant human IgG Fc region.
